

# Garage Security Fence

Wood

16ft unit shown here. Heights can vary up to 4ft

Vinyl

## Problem Solved!

- Pets safely contained
- Young children safe from the street
- Deters strangers from entering garage
- Fresh air into the garage

The system is located approximately two inches behind the main garage door. Independently, the *Garage Security Fence* will operate just like the main garage door. It can be opened and closed manually or can be clipped to the inside of the main garage door and operate with the main door opener. (At any time, the *Garage Security Fence* may be stored and locked-secure in an 'up-and-over' position.)
